## SUMMARY

Full Stack Developer with experience in enterprise and freelance web application development. Skilled in building scalable systems using .NET, Laravel, React, and Angular. Proven ability to enhance performance and usability in production systems at Cloud Manila and across client projects. Passionate about clean architecture, maintainable code, and collaborative development.

---

## PROFESSIONAL EXPERIENCE

### Cloud Manila — Junior Systems Developer

September 2024 – Present

- Develop and maintain enterprise web applications using .NET, and Angular.
- Collaborate with cross-functional teams to implement new features and improve performance.
- Handle debugging, refactoring, and version control using Git and SVN.
- Optimize SQL queries and data models for scalability.
- Key Contribution: Delivered feature enhancements that improved API response times and user satisfaction metrics.

### Key Work Projects:

- **Legacy System Rewrite** — Refactored and modernized a legacy application, improving performance, maintainability, and code readability while ensuring backward compatibility with existing features.
- **Postcode Finder API & Demo Website** — Designed and implemented a RESTful API for postcode lookup, with a companion demo site showcasing live data integration and front-end API consumption.
- **Website & Admin System Maintenance** — Maintained and enhanced production websites and admin dashboards, fixing bugs, optimizing queries, and improving overall system stability and UX.

### Cloud Manila — Systems Developer Intern

February 2024 – May 2024

- Supported the engineering team in developing internal tools and client-facing systems.
  - Participated in sprint cycles, bug fixes, and feature testing.
  - Learned and applied best practices in agile development and source control.
  - Achievement: Assisted in implementing UI improvements that enhanced the product's usability.
- 

## EDUCATION

### Bachelor of Science in Information Technology

Marinduque State University — Graduated 2024

- Major: Software Development
- Relevant Coursework: Software Engineering, Database Systems, Web Development

---

## TECHNICAL SKILLS

- **Languages:** C#, Python, PHP, JavaScript, Typescript, HTML, CSS,
  - **Frameworks:** NET, Laravel, React, Angular
  - **Databases:** MySQL, MongoDB, MSSQL
  - **Tools:** Git, Rest APIs, VS Code, Postman, Figma
  - **Concepts:** MVC, OOP, API Integration, Agile Development
  - **Cloud & DevOps:** Vercel
  - **Collaboration:** Agile/Scrum, Trello
  - **Soft Skills:** Analytical thinking, teamwork, adaptability
- 

## PROJECTS

- **Pharmacy Management System** — Hybrid **Laravel + React** system for admin and POS modules.
- **Coffee shop Website and POS** — Developed using React, Redux, and Next.js, integrating online store and point-of-sale functionalities for unified inventory and order management.
- **Archiving System** — Built with Laravel to streamline digital record management, improving data accessibility and reducing manual retrieval time by automating file indexing and search.
- **Online Transport Permit Processing Website For Butterfly** — Designed and developed with Laravel, automating permit requests, approvals, and tracking for a government environmental process.
- **Equali** — Built an exam and assessment platform with item analysis, question randomization, and automated scoring for educators.
- **Knight in Dungeon** — Developed a top-down 2D dungeon crawler using Unity, featuring enemy AI, level progression, and collectible items.
- **Tic Tac Toe Mobile App** — Created a classic Tic Tac Toe game in Unity, demonstrating core game logic, UI handling, and state management.
